

ABSTRACT OF THE DISCLOSURE

An electronic apparatus includes a housing having an outer wall, a pointing device having a flat input surface, and an operation-area indicating sheet.

5 The pointing device is contained in the housing such that the input surface is placed on the inner surface of the outer wall of the housing. The operation-area indicating sheet is removably provided on the outer surface of the outer wall of the housing at a position
10 corresponding to at least part of the input surface of the pointing device.
